## Experience

---

### Code Unfold Solution

Apr 2026 – Present

*Web Scraper*

- Developing web scraping and **web crawling** solutions using **Python** to extract structured data from websites.
- Utilizing tools like **BeautifulSoup** and **Requests** for static and dynamic data extraction.
- Handling data cleaning, processing, and storage for analysis.

### SavantX Technologies

Jul 2025 – Jan 2026

*Python Full Stack Developer*

*Mohali, Punjab*

- Developed dynamic web application features using **HTML, CSS, JavaScript, Python, Django, and Bootstrap**.
- Built and integrated responsive front-end UI with Django-based back-end APIs for smooth functionality.
- Implemented user authentication, CRUD operations, and responsive design to improve usability.

### Nikhani Control

Jan 2025 - Jun 2025

*Electronics Engineer*

*Mohali, Punjab*

- Worked on electronic and **control systems**, handling testing, maintenance, and troubleshooting.
- Analyzed system performance and resolved faults to improve reliability.
- Supported operations by coordinating with team members on system-level tasks.

### PySpiders Training Institute

Jul 2024 – Dec 2024

*Python Full Stack Development Trainee*

*Bangalore, Karnataka*

- Trained in **Python Full Stack** (Django, DRF, HTML, CSS, JavaScript).
- Built REST APIs using **Django ORM** with CRUD operations and authentication (**JWT, Session, Basic Auth**).
- Worked on real-time projects using **Python, SQL**, and frontend integration.

## Projects

---

### AI Recipe Generator | Django, Python, Groq API (LLaMA 3) | [Live Demo](#)

- Developed an AI-powered recipe generator using **LLaMA 3 (Groq API)** to create recipes from user-provided ingredients.
- Implemented **prompt engineering with validation** to return “Not possible” for non-food inputs.
- Built backend using **Django** with API integration, dynamic rendering, and error handling.
- Generated structured outputs including dish name, ingredients, and step-by-step instructions.

### Employee Management REST API

Django REST Framework, Python, JWT, SQLite

*Backend API for Employee Data Management — [Live Demo](#)*

- Developed a RESTful API using **Django REST Framework** to manage employee records with full **CRUD operations**.
- Implemented **pagination, filtering, and search** for efficient data retrieval.
- Secured endpoints using **JWT authentication** and validated data with **DRF serializers**.
- Tested and verified API functionality using **Postman**.

### Dilip Coffee Teria | Django, Python, HTML, CSS, Bootstrap, SQLite | [Live Demo](#)

- Developed a dynamic coffee shop website using **Django** with product management features.
- Implemented **search, filtering, and pagination** for efficient product browsing.
- Designed responsive UI and integrated **SQLite** with CRUD-based order management.

## Technical Skills

---

**Languages:** Python, HTML, CSS, JavaScript, SQL, MySQL, PostgreSQL

**Developer Tools:** VS Code, Google COLAB

**Technologies/Frameworks:** Django, FastAPI, GitHub, Bootstrap, Web Scraping

**Familiar with:** C/C++, MS Excel, Numpy, Pandas

## Education

---

**Bachelor of Technology in Electronics and Communication Engineering**

**Sept 2020 – May 2024**

*I.K. Gujral Punjab Technical University*

*Jalandhar, Punjab*

## Achievements

---

- 4 star on **HackerRank** , demonstrating strong problem-solving skills.
- **AMCAT Certified** (2023) with strong analytical and programming proficiency.
